About Us.

Ask for More, Ask for *Tubelon*

At Tubelon Pipes, we take pride in being a leading manufacturer of high-quality garden pipes. Based in Ilol, Himatnagar, our state-of-the-art factory produces pipes that are not only durable but also flexible and designed to meet the highest industry standards. **Our commitment to quality is reflected in the 2.5-year guarantee we offer on turbo force heavy duty product, garden hose** ensuring peace of mind for our customers.

Our garden pipes are available in a variety of attractive colors and are designed for flexibility, making them easy to handle and use in any gardening or outdoor environment. Despite their premium quality, we maintain affordability, ensuring that our customers receive the best value for their money.

At Tubelon Pipes, we strive to combine innovation, quality, and affordability to meet the diverse needs of our clients. Whether for home gardens or commercial use, our pipes are built to last and designed to perform.

■ What We Do?

At Tubelon Pipes, we specialize in manufacturing premium garden pipes that combine durability, flexibility, and vibrant designs. With a focus on quality and affordability, we provide innovative piping solutions that meet the demands of both residential and commercial users.

■ Our Services

01

High-Quality Pipe Manufacturing

We produce garden pipes using top-grade materials to ensure long-lasting durability and performance.

02

Customizable Colors & Designs

Our pipes come in a variety of attractive colors, offering flexibility in both function and appearance.

03

Affordable Solutions with Warranty

Get high-quality garden pipes at competitive prices, all supported by a 2.5-year guarantee we offer on turbo force heavy duty product, garden hose and reliability.

Blue Black Garden Hose

First of all, if we talk about cheap and good garden hose, we have brought the Blue Black Garden Hose By TUBELON - The Way Of Water.

This pipe is used for the purpose of normal water applications. In its manufacturing, black material is used in the inner layer and virgin coating in the upper layer so that the look and feel of the pipe is maintained. Below is the weight chart and photo of this pipe.

Weight Chart for Blue-Black Garden Hose:

Sr No.	Size	Weight	Meters
1	1/2"	3.5kg around	30 meters
2	3/4"	6.5kg around	30 meters
3	1"	9.5kg around	30 meters
4	1.25"	--	--

Eco-flex Garden Hose

As its name suggests, this pipe comes in the economical range. In producing this pipe, we use green soft PVC material. Usually, we are producing lightweight products for this article to achieve economic range. This pipe is also used in normal water applications. This pipe is not recommended for water pressure applications. Below is the weight chart and photo of this pipe.

Weight Chart For Eco-flex Garden Hose:

Sr No.	Size	Weight	Meters
1	1/2"	3.0kg around	30 meters
2	3/4"	5.8kg around	30 meters
3	1"	8.5kg around	30 meters
4	1.25"	--	--

Red Velvet Rubber Hose

We have named almost all our articles from their appearance or their make or their characteristics. This pipe is also made of soft PVC material but due to the mixture of some materials in it, it gets the overall shining and finish hence it is named red velvet hose. The possibility of sticking in this pipe is negligible and hence it is suitable for use in many fresh water applications. Below is the weight chart and photo of this pipe.

Weight Chart For Red velvet Rubber Hose:

Sr No.	Size	Weight	Meters
1	1/2"	3.5kg around	30 meters
2	3/4"	6.2kg around	30 meters
3	1"	9.2kg around	30 meters
4	1.25"	--	--

Black Unbreakable Hose

If we talk in the true sense, our expertise in PVC material starts from here. TUBELON as a brand prides itself on such articles. In it, we have developed this UNBREAKABLE BLACK HOSE from one of our secret formulas. We use unbreakable black material in manufacturing this pipe. It is suitable for commercial construction, outdoor water applications, and boring water pressure applications. Below is the weight chart and photo of this pipe.

Weight Chart For Black Unbreakable Hose:

Sr No.	Size	Weight	Meters
1	1/2"	4.5kg around	30 meters
2	3/4"	7.5kg around	30 meters
3	1"	10.5kg around	30 meters
4	1.25"	13.5kg around	30 meters

Fire Construction Hose

As we have talked about in the above article, here too black material is used in pipe making. In addition, there are 2 layers of pipes. In which the inner layer is developed with unbreakable black material while the upper layer is coated with soft virgin PVC material to give the pipe strength as well as proper look and feel. This pipe is also recommended for use in commercial construction, water boring pressure, vehicle domestic washing. Below is the weight chart and photo of this pipe.

Weight Chart For Fire Construction Hose:

Sr No.	Size	Weight	Meters
1	½"	4.5kg around	30 meters
2	¾"	7.5kg around	30 meters
3	1"	10.5kg around	30 meters
4	1.25"	13.5kg around	30 meters

Milky Hammer Rubber Hose

Here unbreakable milky white material is used in making the pipe, this material adds strength to the pipe along with a good look. Hence this pipe is also advisable for all types of use like UNBREAKABLE BLACK HOSE, FIRE CONSTRUCTION UNBREAKABLE HOSE. Below is the weight chart and photo of this pipe.

Weight Chart For Black Unbreakable Hose:

Sr No.	Size	Weight	Meters
1	½"	4.5kg around	30 meters
2	¾"	7.5kg around	30 meters
3	1"	10.5kg around	30 meters
4	1.25"	13.5kg around	30 meters

Milky Constructor Hose

As mentioned above milky material, unbreakable milky white material is also used in this pipe. But the difference here is that the pipe has been made in 2 layers like a fire construction hose here too. The milky white material is used inside while soft PVC virgin material is coated on top to enhance the pipe's appearance. This pipe is also recommended for many tough water applications and water pressure applications. Below is the weight chart and photo of this pipe.

Weight Chart for Milky Constructor Hose:

Sr No.	Size	Weight	Meters
1	1/2"	4.5kg around	30 meters
2	3/4"	7.5kg around	30 meters
3	1"	10.5kg around	30 meters
4	1.25"	--	--

CNG GARDEN HOSE

As we have often pointed out earlier, we have named many articles based on their appearance or color. Here too something is similar. This pipe is a 2 layer pipe in which super green material is used inside while soft PVC virgin material is coated on the load side. Thus, yellow and green colors are equally used for CNG vehicles in India, hence we have named this article CNG garden hose. Below is the weight chart and photo of this pipe.

Weight Chart For CNG GARDEN HOSE :

Sr No.	Size	Weight	Meters
1	1/2"	3.5kg around	30 meters
2	3/4"	6.5kg around	30 meters
3	1"	9.5kg around	30 meters
4	1.25"	--	--

Crystal Blue Hose

As we see here the word crystal is used in naming the pipe. As crystal means "just like glass". Here we use soft pvc material with fully crystal shining in the production of pipe. This material gives a very mirror polish to the pipe. The property of this material is that it imparts luster to the pipe as well as jump to the pipe which is a novelty in itself. The chances of pinching, knotting in this pipe are negligible. Hence this pipe is one of the reasons of choice of many people. This pipe can be used in water pressure applications, normal water usage. Below is the weight chart and photo of this pipe.

Weight Chart for CNG GARDEN HOSE:

Sr No.	Size	Weight	Meters
1	½"	3.5kg around	30 meters
2	¾"	6.5kg around	30 meters
3	1"	9.5kg around	30 meters
4	1.25"	--	--

Imported Jumping Hose

The jump in soft PVC material can be caused by some chemicals or mixing with some other material. Here too we mix a material that provides enough bounce to the pipe. Due to this type of jump, its flexibility remains intact in the pipe even when it gets very cold. Garden pipes often become stiff and brittle due to cold weather. Hence using it becomes very challenging and a headache. In this material, we provide flexibility even in extreme cold. So the use of this pipe becomes pleasant for people even in cold weather.

Weight Chart for Imported Jumping Hose:

Sr No.	Size	Weight	Meters
1	½"	4.5kg around	30 meters
2	¾"	7.5kg around	30 meters
3	1"	10.5kg around	30 meters
4	1.25"	--	--

Turbo Force Heavy Duty

The development of this pipe by TUBELON is an achievement for us. This pipe is made using pure virgin soft PVC material and some other secret material. This pipe is specially recommended for use in water pressure. This pipe also fights against very high pressure of water. Generally, super yellow color material is used in this. Sometimes we also come across golden material with this characteristic. It is called 24 Carat Heavy Duty Hose by TUBELON. The warranty does not cover any type of transport damage or pipe damage caused by hitting a nail or other sharp object. Below is the weight chart and photo of this pipe.

Weight Chart for TURBO Force Heavy Duty:

Sr No.	Size	Weight	Meters
1	1/2"	4.5kg around	30 meters
2	3/4"	7.5kg around	30 meters
3	1"	10.5kg around	30 meters
4	1.25"	--	--

Saffron Gold Foam Pipe

This pipe is a different type of pipe with a different look and feel to the pipe. The specialty of this pipe is that this pipe feels very velvety in hand and its smooth finish and disco properties make it a lot of fun to use. The material of this pipe comes to us in saffron color, so we have given the name of this pipe as Saffron Foam Imported Material Garden Hose. In this pipe, the chances of pipe twisting, kinking, tightening or cracking are negligible. This pipe is recommended for domestic water use. Below is the weight chart and photo of this pipe.

Weight Chart for Saffron Gold Foam Pipe:

Sr No.	Size	Weight	Meters
1	1/2"	4kg around	30 meters
2	3/4"	7kg around	30 meters
3	1"	10.2kg around	30 meters
4	1.25"	--	--

Regular Foam Pipe

Like the saffron pipe above, this material also has a very smooth finish on the surface of the pipe. But here the characteristics, properties, and nature of the pipe are different. Apart from this, this pipe is also budget friendly. Hence this pipe is named regular foam pipe. Below is the weight chart and photo of this pipe.

Weight Chart For. Regular Foam Pipe:

Sr No.	Size	Weight	Meters
1	½"	3.0kg around	30 meters
2	3/4"	5.8kg around	30 meters
3	1"	8.5kg around	30 meters
4	1.25"	--	--

Mulmul Rubber Hose

In this pipe we use a material that looks like rubber, this material is usually soft and flexible. One of the properties of this material is that its outer surface feels like mulmul when handled. Hence it is called mulmul pipe because of that property. This pipe is advisable for use in cold regions, and where pipe jumps are required. Below is the weight chart and photo of this pipe.

Weight Chart for Mulmul Rubber Hose:

Sr No.	Size	Weight	Meters
1	½"	3.5kg around	30 meters
2	3/4"	6.5kg around	30 meters
3	1"	9.5kg around	30 meters
4	1.25"	--	--

Thank You!

Hopefully, we can work together and we can be successful together!
